

A philosophical movement project:

Logical Spirituality

A Comprehensive View of Spirituality Together with the Logic of Nature

Logical Spirituality synthesizes the traditional spiritual teachings of various cultures with social knowledge, making them comprehensive, and brings to light the unseen logic of nature. It explains how the principles of equality and freedom can be observed in perceived reality, focusing on the health of all living beings, through the perspectives of Interconnectedness and Justice in Nature.”

Why Spirituality?

Logical Spirituality unites beliefs, science, nature, art, and technology — displaying how everything is already connected, seen and unseen.

Scope

- Understanding why living beings become ill, and how to prevent disease naturally, without relying on medicine.
- Exploring the deep interconnections between philosophy, psychology, sociology, and related fields.
 - Demonstrating how various disciplines are woven together within the smaller and larger cycles of life that repeat across all communities in similar patterns.
 - Presenting example scenarios to address global issues through innovative, visionary, inclusive, and comprehensive solutions.
 - How to understand nature's silent language that is already translated via human symbols.
- Discovering how luck is formed, shaped, renewed, and dissolved within nature's flow.
 - Understanding how talents emerge and evolve, and how behaviors directly influence their growth.
 - Aligning social interactions more harmoniously with nature's scale of luck and balance.
 - Explaining and enhancing business practices in healthier and more sustainable ways to uplift both individual and community spirits.
 - Unlocking the hidden gifts that nature already offers.
- Reinterpreting historical events — from global shifts to personal life experiences — through a new, integrative lens.
- Revealing the unseen justice embedded in nature, designed for the benefit of all living beings.

Would you like to be a sponsor for this project?

We can raise awareness in people so that they can see the logic in nature and together we can heal the mistakes that repeat in our life cycles.

Goals

- Building an education and healing platform that addresses each topic outlined in the project's scope in depth.
 - Establishing both online and offline presences to reach wider audiences in the form of a philosophical movement.
- Expanding the project's content across multiple languages and regions to inspire spiritual growth through nature's logic.
 - Engaging with the public by collecting and answering questions; enhancing and improving the project's contents.
 - Helping communities to solve their (unique) challenges.
- Developing as a non-profit organization that collaborates and forms partnerships with other groups worldwide.

Project Needs (Education & Healing Platform) - Phase #1

Assets

Office area, computer, headphones, microphone, video camera

Team Members

Social science enthusiasts, video and animation maker, script reader (voice), social media manager, event manager

Spendings (*to be estimated*)

Monthly subscriptions, social media advertisements, publishing, travel
