Fundación mapfre
Awards for
Social
Innovation

1234S.org

Name of the organization if different from the solution (if the same, leave it in blank)
N/A

Although the application is in English, the official languages of the Awards are Spanish, Portuguese and English. Feel free to fulfil it in any of these three languages. Here you have a translation of the application document in the three languages Traducción / Traduçao / Translation of the Application HERE
Not accepted

Date the company was legally constituted or the project was launched
Date the company was legally constituted or the project was launched
1st September, 2025

Geographical area where the project has an open representation and competes:
EUROPE

Region-Country from where your project competes
EUR-Turkey

Which area does your solution impact the most? (see Terms & Conditions of the call)
Physical well-being

Brief description of your project
Logical Spirituality is an open-source, nature-aligned system of thought designed to transform global politics, business models, and healthcare. By equating God’s logic with observable scientific truths, it addresses systemic stress, digital exploitation, and disease at their root cause without relying on pharmaceuticals or manipulative technology. Driven by international litigation against Big Tech and their partners (such as UN Complaint WHRC 37992) and open-source public education, the movement seeks corporate restitution to fund public health restoration. Ultimately, it aims to establish a fair global framework rooted in nature's principles of equal opportunity, freedom, and universal balance.

What was the main personal motivation for launching this Project?
The primary motivation stemmed from experiencing systemic harms directly and recognizing that people's bodies and emotions are being controlled without their consent through an illicit global economic model linked to centralized AI technology. Witnessing repeating global mistakes, systemic blockage, and a lack of sincere responsibility across societies, I took the personal risk to question conventional education and uncover these public health and environmental harms. Driven by a desire to relieve societal suffering and free citizens from artificial manipulation, the project was launched to establish a medicine-free, nature-aligned system of equality and freedom.

ELIGIBILITY REQUIREMENTS

Is the product or service already on sale or in operation? To participate, the product or service must already be in operation or available for purchase in the market. For projects focused on R&D, a sufficiently advanced prototype validated with users is considered.
Yes

Does the project have at least two people working full-time? To participate, the project must have at least two people working full-time or full-time equivalent, with at least one of them working full-time (e.g., 1 person full-time and 2 people part-time).
Yes

Has the project billed or received investment of at least 100,000 euros (aggregate) during the last 3 years? The 100,000 euros include: contributions from partners, capital increases, awards, product or service sales, and/or royalties. In the case of a spin-off or university research department, these 100,000 euros are equivalent to the budget allocation assigned by the parent company
No

Ad-hoc pitch for these awards: To participate in this call, a 3-minute video of the project with sufficient professionalism and exposure level will be required. Has the video pitch been provided in the question indicated above?
Yes

Is the project based in one of the 4 regions where the awards seek to promote this type of initiative? To compete, the project must have representation in operation in one of the 4 areas [Latin America, Europe, Brazil, or the United States of America]. Carefully review the participation rules.
Yes

EVALUATION REQUIREMENTS :

1. SOCIAL IMPACT

What is the social problem or need identified and the solution provided?
Problem: Centralized AI and Big Tech enforce an illicit global economic model that treats health as a profit sector, distorting natural reality and causing artificial stress, pharmaceutical dependence, and structural inequalities across communities. Solution: Logical Spirituality is an open-source, nature-aligned system of thought and legal movement. Equating God’s logic with scientific truths in nature, it offers medicine-free health guidance, ethical interface design principles, and international litigation (such as UN filing WHRC 37992) to secure corporate compensation for public health restoration.

Describe your Theory of Change (How/why do you expect this solution to generate the chain of events required for the abovementioned problem to be solved)
Litigation & Public Education: Submitting international filings (eg. UN WHRC 37992) and publishing open-source resources exposes corporate overreach and educates citizens on digital and biological stress. Natural Health & Ethical Design: Implementing non-pharmaceutical, preventive wellness practices and non-

addictive user interfaces directly reduces pharmaceutical dependence and digital strain. Systemic Restructuring: Restitution won from corporate litigation and public support fund public health restoration, while aligning daily work, politics, and business models with nature's principles restores long-term well-being and equal opportunity for all.

What are your key KPIs to measure your social impact?
Legal filing progress (eg. WHRC 37992), corporate restitution funds secured, pharmaceutical dependency reduction rates, open-source adoption, and self-reported mental/physical health improvements.

Number of people DIRECTLY impacted today
11–100 beneficiaries directly impacted today.

In how many countries/states is the project currently impacting?
3

What countries/states are them?
Türkiye, Germany, USA

2. INNOVATION OF THE PROJECT

Describe the INNOVATION your project offers.
How is your project disrupting the sector?
The Logical Spirituality movement disrupts conventional models by integrating technology, natural health, legal rights, and secular spirituality into one open-source system of thought. Unlike traditional organizations that commercialize healthcare, it replaces pharmaceutical dependence with medicine-free, preventive wellness rooted in nature's cause-and-effect laws. Rather than accepting Big Tech exploitation, it pursues direct international litigation (such as UN Complaint WHRC 37992) to secure corporate restitution for public health restoration. By equating God’s logic with observable scientific truth and offering non-addictive tech solutions, it eliminates digital strain and reshapes business models around true equality and freedom.

What is the status quo or conventional way of solving this problem, and how does your solution fundamentally break that paradigm?
While the status quo treats health as a profit sector dependent on pharmaceuticals, Logical Spirituality breaks this paradigm through medicine-free preventive health, open-source scientific spirituality, and international litigation forcing Big Tech corporate restitution for public health.

What is your competitive advantage?
Our competitive advantage is offering a broader perspective on spirituality that replaces pharmaceutical dependence with medicine-free natural health, aligns its teachings with scientific truth, and leverages direct international litigation to redirect corporate restitution straight into public health.

Why is your solution difficult for competitors to replicate? Wrights protected (IP)?
Our solution won't be seen something to be replicated because it relies on non-commercial system of thought around natural laws rather than profit models, offers itself as the root solution to global health issues, and initiated by international and regional legal filings.

List the main competitors/organizations. Argue why your proposal is the best.
Major competitors include pharmaceutical giants, wellness/mental health apps, commercial tech platforms, and traditional religious institutions. The Logical Spirituality movement is better because it provides a free and open-source framework linking true science, natural health, and human rights to eliminate root causes of disease without medicine.

What is the main outcome you expect to achieve over the next 6 months, and how do you expect being a finalist and/or winner to contribute to it?
Over the next six months, our main outcome is to advance international legal action and public support, expand open-source adoption on 1234s.org, and validate medicine-free health practices. Being a finalist or winner provides the legal support, global visibility, and strategic network needed to tackle Big Tech crimes, accelerate movement adoption, and secure restitution for public health restoration.

3. PROJECT VIABILITY

Countries/States where your project has representation
Türkiye, Germany, USA

What's your revenue model?
Our revenue model combines near-term corporate litigation damages and legal settlements with public health grants, government development contracts, and long-term educational advisory services, and ethical verifications for nature-aligned organizations.

Is the product/service already on sale/operation? If not, justify adequately (see terms and contitions of the call).
It's on operation.

What has been the revenue volume for the last 3 years? (currency in EUROS. Exchange rate as of October 15, 2026, or the application submission date). Read the call rules carefully about the concept of "revenue".
No revenue at the moment because it's non-commercial and still seeking public support.

What is your current Burn Rate IN EUROS (monthly cash spent) and current Runway (months of financial survival)?
Burn rate is €350. Self-funded through personal reserves, providing a runway determined by available capital (e.g., €2,100 provides 6 months of runway; €4,200 provides 12 months).

Income statement. Fill out this DOWNLOADED document.
Accepted

4. TEAM

Number of full-time employees.
1

Number of part-time employees (see Terms & Conditions of the call).
1

Regarding the critical positions of the team, describe what these positions are, who occupies them, and briefly describe what relevant training/previous experience they have for their current position in the project
Occupant: Emin Bu?ra Saral as the founder and the Spirit Guide. Role & Responsibilities: Leads overall strategic direction, software architecture, open-source system of thought engineering, legal strategy, and preventive health research. Relevant Experience & Training: Computer Engineering background (B.S. from Koç University) with software engineering experience spanning global tech hubs (including Silicon Valley and Munich). Dedicated full-time to developing the open-source TypeScript/Next.js infrastructure for Logical Spirituality, synthesizing technical expertise with deep research in ancestral health systems and universal human rights. --- Occupant: Hatice Saral as the financial officer & supporter Role & Responsibilities: Provides personal financial backing to fund the monthly burn rate (€350/month) and manages operational budget allocation. Relevant Experience & Training: Longstanding family management experience, providing foundational financial stewardship and administrative support to ensure continuous project runway and self-funded stability. Yeah, I am talking about my mom. :)

What percentage of the equity is currently owned by the founding/management team?
100%

Other expert people supporting your project (Advisory Board, mentors,…). Tell us how their experience add value to your project. (No words limit).
This is a very innovative and new approach. That's why I don't have anyone to give me suggestions even though I learn something from everyone.

OTHER RELEVANT QUESTIONS

Is there anything that we haven't asked and you think is relevant to share with us?
It doesn't make sense to answer a lot of questions and waste my time to beg you for a little bit money to help people. I feel terrible. Because I was earning €4500/month (net) in 2023 before I volunteered to focus on the global health issues nobody takes care of. Now I am broke for months. This is another proof why the system change is a must.

What other relevant milestones have you achieved?
- Formal International and Regional Legal Action: Prepared and filed Complaint WHRC 37992 to the UN Human Rights Council (October 16, 2026), establishing a legal framework targeting Big Tech overreach to secure public health restitution. - Open-Source System Launch: Built and deployed the primary open-source TypeScript/Next.js codebase for 1234S.org, making non-addictive digital tools publicly available. - Medicine-Free Framework Formulation: Developed a practical preventive health system uniting natural lifestyle interventions, non-addictive design standards, and scientific reasoning. - Sustained Operational Independence: Maintained 100% full-time development and operational continuity on an ultra-lean €350/month budget, proving complete organizational autonomy.

DATA PROTECTION

If you wish to keep informed of future editions of the Fundación MAPFRE Awards for Social Innovation and receive information from the Entities, check the following boxes:
Please check this box if you consent IE and IE Foundation to process your data (even when this is undertaken outside the EEA) and send you personalized commercial information and/or information about our activities, based on profiles created using the information obtained even by third parties, in accordance with the stipulations of the Privacy Policy: https://www.ie.edu/privacy-policy/ | I consent the processing of my data by Fundación MAPFRE for sending personalized information about activities, based on profiles created using the information obtained, even by third parties, in accordance with the stipulations of the Privacy Policy: https://www.fundacionmapfre.org/fundacion/es_es/politica-privacidad/privacy-policy-awards-social-innovation.jsp
