What problem is your company solving? (company description)
The Logical Spirituality movement addresses the root of all global crises by revealing how nature's universal patterns interconnect: Economic inequality, failing health systems and misaligned education. Modern institutions reduce health to profit and rely on fragmented scientific and political narratives, leaving communities blind to cause-and-effect in their environments. We bridge interdisciplinary logic and natural principles to drive fair, sustainable, and transparent governance for all.

How is your company solving this problem?
We provide a unique and groundbreaking open-source framework connecting nature's laws, science, and health. We eliminate pharmaceutical reliance by teaching natural, preventive wellness, release open blueprints for ethical, stress-reducing software, and take legal action (such as UN Complaint WHRC 37992) against corporate overreach. This restores public health, restructures governance around equality, and redirects damages to compensate citizens.

Unique Value Proposition
We combine science and health into a free open-source thought system explaining natural laws within a broader perspective on universal realities, without relying on pharmaceuticals or subscription models. Instead of profiting off illness or digital addiction, we address the root causes of stress, enforce corporate accountability through international litigation, and align business and governance directly with the principles of nature.

Have you filled any patents?
No

What is the Technology Readiness Level (TRL) of the start-up supported?
(8) System complete and qualified

What kind of product/s does the company offer?
Software Physical Product

When was your project born?
2025

When was the company legally registered?
2026

Metrics & Funding

Target Market
Individuals seeking medicine-free, preventive wellness; citizens affected by corporate tech overreach and digital stress; seekers of nature-aligned spirituality; and ethical entities adopting transparent design and governance. Market Size: - TAM: $5.5T+ (Global Health Wellness and Digital Health markets). - SAM: $600B+ (Global non-pharmaceutical preventive care and humane tech segment). - SOM: $50M–$500M (Targeting citizens in several countries in Europe, Asia and America).

Market Size
+ 1B $

Main Business Type
B2C

Do you have any additional Business Model?
B2B B2B2C B2G

General model of Income/Business Model
License/Royalties Non Profit

Go-to-Market Strategy
Income Streams: Multi-tier non-profit model. Primary funding comes from donations, partnerships and corporate litigation settlements (UN WHRC 37992), supplemented by public health grants, and long-term auditing/licensing. Reach Retention: Acquire users via open-source tools (GitHub, 1234s.org), legal campaigns, and news outreach. Retain through medicine-free health results and transparent, non-addictive UI standards. KPIs: Legal impact, repository forks/traffic, and user health outcomes.

Number of Clients (Paying users)
0

Number of (non-paying) Users
40

Describe the Cost Structure of your company
Main Costs: - RD and Infra: Open-source platform hosting (1234s.org/GitHub) technical development. - Legal and Advocacy: Filing/maintaining international litigation (e.g., UN WHRC 37992). - Outreach and Ops: Community engagement awareness campaigns. Primary KPIs: - Legal Impact: Active litigation filings restitution secured. - Platform Reach: Website traffic, open-source forks/clones, 11–100 active non-paying users. - User Health: Reported qualitative wellness outcomes.

Peace, justice and strong institutions 17. Partnerships for the goals

How does it impact or why?
Technical Credibility: 10+ years of Silicon Valley Munich engineering ensures battle-tested, scalable open-source architecture for 1234s.org. Domain Alignment: Multi-disciplinary legal, health, and tech expertise bridges public-interest advocacy (e.g UN WHRC 37992) with a unique ethical system and governance design. Lean Operational Execution: Volunteer-led specialist network delivers high-impact legal filings and open-source infrastructure at zero initial equity cost.

Impact Metrics
Legal Accountability: 1 active international filing (UN WHRC 37992) and several national filings targeting human rights tech practices. Beneficiary Reach: 11–100 active non-paying users accessing free preventive health and open-source thought system. Open-Source Availability: 100% free, publicly accessible tools and blueprints hosted on 1234s.org GitHub. Capital Efficiency: $0 commercial revenue and $0 external funding used to maintain operational reach.

Do you believe your solution benefits, or has the potential to benefit, people with disabilities?
Yes

Please write a detailed explanation on how your solution benefits people with disabilities.
The Logical Spirituality movement explains cause-and-effect lifestyle practices tailored to manage chronic illness, stress, and mobility challenges and offers preventive approach to all disabilities.
