Dear representatives of World Health Organization,

I am a computer engineer living in Trabzon (Türkiye) who wants to solve societal problems. For years, I have been examining political issues in different countries such as Türkiye, the United States, and Germany, and I have been trying to explore the problems I have experienced deeper and expose the information I have found with proper solutions.

I am seeking the support of relevant authorities worldwide so that it becomes known how major technology companies are harming public health through illegal methods. Then to stop the harm they are causing. I've contacted a lot of organizations and institutions such as the Ministry of Interior and the Ministry of Health in Türkiye for help, but for months no one has taken an interest in the matter. The local prosecutors to whom I submitted my complaint by petition have chosen not to engage with this important issue.

I hope that by checking the case with me and informing the public about the matter, you may be able to help draw the attention of the authorities and contribute to ending those illegal business methods applied to all citizens.

The hidden details of those companies that you may discover in the details of the case I examined may be new and confusing to you. I am quoting below what I believe is the most important and urgent part that deserves attention:
“...
It turns out that the harm caused by the devices and tools we use in our daily lives, along with the reactions and illnesses in our bodies, originate from materials placed in the mouth. It appears that the material injected into the bone tissue in our mouths during root canal treatment and/or fillings is actually a biological device. It is not yet known whether these biological devices that control the body are injected also with vaccines administered during infancy/childhood. We can feel the chemicals leaking from the tissue inside our mouths according to our speech and actions. The taste of the fluid injected to "numb" the area during dental treatment proves that this device is independently releasing a chemical fluid into your mouth. The fluids artificially released in your mouth during speech are entering your body without your control. You can analyze that many serious problems originate from the device in your body by experiencing situations in different contexts: Eye irritation, allergies caused by the foreign substances in your body, headaches (pressure sensation), fake cravings (hunger, thirst, sexual desire, addictions such as smoking), fake desire loss (in appetite, sexual interest, or attention), dizziness, metallic poisoning, headaches, disorientation, irritability, anger, attention inefficiencies, fear, numbness, memory problems, mouth smell, tooth yellowing, and difficulty speaking. When analyzing different situations, you can focus on changes in taste and the fluid released in your mouth.
...”

You can read my blog post in which I try to explain the issue with more details:
https://www.1234S.org/en/blog/the-rape-case-of-big-tech-companies
If the link does not open, you can read about my complaint in the attached screenshot.

Some information may be missing or not fully correct, because I have been testing the case on my own in my environments. You may want to double check the information I've shared in my blog post.

Can you help me to find and talk to relevant authorities to check this case with me, please? Because I am getting hurt everyday.

I believe you are capable of understanding the urgency of this issue, in which millions of people worldwide are being victimized. I hope we can discuss the details of this matter, so I look forward to your reply.

Thank you.
